

PALM SPRINGS ART MUSEUM, PALM SPRINGS CA Water Conservation and Demonstration Garden

Artefact Design created a sign program consisting of 15 interpretive panels and plant labels. The mid-century modern setting of the Museum required a restrained design and very tough materials to stand up to the intense sun and heat of the semi-protected outdoor area. Crisp design, photos, original illustrations and accessible language explain the benefits of water saving techniques for desert gardens.

Artefact Design: Sign and support design, writing, graphic design and illustration, fabrication coordination.
