

## SAN DIEGO MUSEUM OF MAN

### Footsteps Through Time: Four Million Years of Human Evolution

Footsteps Through Time is a permanent 7,000 sq. ft. installation at the San Diego Museum of Man. The National Science Foundation funded exhibition features five galleries covering the past four million years of human evolution. The educational component was designed to meet 6th grade CA State Standards.

The Artefact team provided interpretive planning, writing, exhibit design, graphic design, and fabrication coordination.

Fabrication and installation: Contempo

Open 2002.

#### *Primate Hall interactives:*

- Primate behavior video lift panels
- Primate comparisons
- Scientist profiles

#### *Hominid Hall interactives:*

- DNA comparisons
- Nutcracker jaw
- Fossil dating wall
- Toolbox
- Fishing for termites
- Grave sites (motion & sound activated)
- Skull sorting
- Scientist profiles

#### *Human Lab interactives:*

- Human brain connections
- Genetic choices
- Cloning
- Nanotechnology
- Discovery Labs
