NOVO ENGINEERING, VISTA, CA

CORPORATE ART MURALS

NOVO is a product development engineering and design firm for medical devices, biotech and print technology. Established in 2003, their clients include some of the world's most successful technical product companies. NOVO invited the Artefact team to design two murals to showcase their services and products in their corporate office.

The Artefact team worked with NOVO to develop the concepts, create the artwork and develop the final fabrication and mounting method. Client installed in 2016.

Client: Novo Engineering, Inc
